bott – an introduction

For almost 90 years we have been offering our customers all over the world a wide-ranging product portfolio, the highest-possible quality and a first-class service. In particular, the high level of customer satisfaction ensures bott's continued growth.

Innovation has the highest priority at bott. With us you'll invest in a modern, long-term solution and therefore in lasting success.

Founded:	1930
No. of employees:	1300
Locations:	3
Countries:	> 35
Partners and branches:	> 100
Turnover:	196 million euros

Status: 2022

Experience makes the difference

As a long-term global partner, we supply consistently high-quality products, services and solutions that offer an excellent price-performance ratio. The result is an exceptional customer experience. We deliver intelligent workplace and mobility solutions for tradespeople and companies who are targeting greater operational efficiency or simply a better use of space.

To this end, we combine our innovative, high-value products and services with new technologies to create integrated, market-leading solutions that are based on thorough knowledge of customer needs. In a

fast-changing world, we must be agile and flexible. In a dynamic environment, we are constantly learning, working together on an international level and coming up with new products. This enables our employees and other stakeholders to contribute to our joint success and to benefit from it themselves.

Quality principles

Certified in
accordance with
DIN EN ISO 9001

Certified environmental management
in accordance with ISO 14001

Certified

Certified quality

High stability, sturdiness and durability:

These are our main principles for production of bott products. By delivering the best quality possible, we guarantee that your investment will be worthwhile. We always validate our production and logistics processes through internal and external guidelines, inspections and audits.

Our quality principles

- Certified in accordance with DIN EN ISO 9001
- Certified environmental management in accordance with ISO 14001

Your idea - our planning

Configuration depending on requirements

Practice oriented planning

Versatility and flexibility

Individual and variable

Are you looking for an innovative solution for manual assembly with simultaneous picking? We can adapt the avero workstation storage system exactly to your individual requirements. It thus provides you with ideal conditions to ensure efficiency, ergonomics and safety at your workstations.

For your industrial company to be successful in the long term under modern, global economic conditions, it needs to remain adaptable. It is only then that you can react quickly enough to new demands on a product. The avero workstation storage system's modular construction is versatile and flexible. Individual components can be readily and permanently adapted and expanded.

bott on the assembly line

Integrative modular system

Numerous combination
options

Connection to
existing systems

Flexibility in manual assembly

Thanks to the integrative modular system, you can create single and multi-workstations, assembly or handling lines and parts trolleys from only a few different components. Thanks to the special avero connection technology, you can combine steel serial parts with modules made of aluminium profiles. You can accommodate equipment of all kinds on the perforated walls and ergonomically adjustable material shelves at the required station in a clear and handy way.

Together with partner companies we offer you customised solutions for manual assembly, including connection to existing manufacturing systems and IT infrastructure.

Modularity

Versatility

Fast adaptation

Process reliability

Change requires adaptation

Modern manual production is only future-proof if you can adapt it to the continually changing individual requirements. With the modular avero workstation storage system, you can react to new challenges quickly and with reliable processes.

The modular avero system makes it easier to exchange and add elements. This way you are well prepared to handle a high number of variants precisely and without errors. A quick conversion to match new circumstances is easy to implement with avero.

Material flow

Material supplies

Time-saving transfer

Individual transport lines

Smooth transitions

To prevent you losing time for the transfer of material and workpieces, our avero system offers you numerous options for supplying and connecting workstations. Examples include supply trolleys, stationary or mobile material supply shelves, roller tracks, handling lines or even the integration of a driverless transport system.

In addition, you can connect the avero workstation storage systems via handling lines. The work piece carrier moves from station to station via wheels, rollers or balls. This way, our avero system guarantees your efficient material flow.

Thanks to an optimised material flow, production times can be reduced and processes made leaner. FIFO shelves ensure continuous supplies and guarantee smooth workflows.

Ergonomics

Maintaining health

Optimum posture

Correct lighting

Ergonomics

Your employees' health is an important resource. To help you keep them working healthily as long as possible, avero supports a favourable posture at the workstation. Infinitely variable shelves, swivel frames and height-adjustable tables make it easy to adapt working conditions to employee height.

The modern LED lighting at the workstation goes easy on the eyes and helps your employees concentrate better. The electric cables are housed securely and tidily in cable ducts. You can exit cables in the right place at brush strips. In addition, we are happy to integrate connector strips for you for the proper and secure connection of your IT equipment.

The bottBox

Provision of small parts

Systematic labelling

Ergonomic handling

The bottBox

reddot award 2015
winner industrial design

With the bottBox we are offering you a unique innovation. The bottBox stores small parts tidily and allows practical access to them. We have developed this product for use in industry, in the workshop and in service vehicles as well. The made in Germany bottBox received the iF Design Award and the Red Dot Award for its successful design and versatile properties.

The bottBox can be suspended on perforated panels or specially designated support rails. Dividers and transparent hinged lids turn it into the ideal material box for multiple purposes.

Ergonomically shaped handles ensure you always have the bottBox firmly in your hands. You can remove the viewing window and move it towards the back. The pane thus dispenses the small parts to be removed: the bottBox as a service tray.

You can replace the coloured clip for labelling the front of the bottBox. This makes systematic arrangement on the shelf easier for you and ensures clarity. You can also label the bottBox on the back using stock and Kanban cards if you wish: the bottBox as a shelf box.

perfo

Positioning tools

Careful sorting

Solid tool carriers

Organisation systems

You can provide tools clearly using the perfo perforated panel system. Everything is stored tidily and is quickly on hand. We supply a comprehensive range with perfo hooks, shelves and tool carriers.

perfo from bott guarantees efficiency and order at the workstation. The systematic provision of tools and small parts guarantees fast access to these. perfo offers a standardised system with numerous different perfo hooks and tool carriers. There's something for everyone here.

The powder-coated surfaces of the perfo perforated panels provide sturdy and long-term protection even under heavy loads. The perfo hooks are zinc-plated and extremely sturdy.

The concealed cable holders on the avero workstation storage system bundle and fix the electric cables in place. This way they ensure order, safety and flexibility. Thanks to the brush strips, the cables can exit the channel at any point.

ESD protection zones

Comprehensive protection during assembly

Conductive surfaces throughout

Equipment including removal

ESD protection zones

On request, we offer the avero workstation storage system in a complete ESD version. For the processing of microelectronic components, workstations with completely conductive surfaces are essential in many areas of manual assembly these days. They provide protection against uncontrolled electrostatic discharge and thus against invisible damage inside the components.

Electrostatically protected areas and ESD workstations are necessary almost throughout electronics manufacturing and semiconductor processing. We deliver the complete solution for your entire material flow chain from a single source: from

advice and definition of individual requirements through delivery of adequate ESD equipment and preparation of acceptance and test protocols as well as audit reports. We manufacture our ESD products in accordance with the IEC 61340-5-1 standard and have them tested accordingly.

Our ESD equipment is much more than just the ESD workstation: from storage cupboards for incoming goods areas through heavy duty trolleys or handling lines between workstations to parts trolleys or material supply shelves. This way, we can guarantee you ESD protection all the way.

Individual complete solution

Quality Assurance

Flexibility and variability

Future-proof manual assembly

avero in conjunction with assistance systems is the perfect complete solution. It creates the perfect conditions for consistently high product quality with maximum flexibility and variability.

bott and ELABO work with you to analyse your individual needs, and deliver the complete solution to suit your work processes and requirements.

The software solution in connection with the workstation storage system saves you time and consistently eliminates all sources of error. bott and ELABO optimise your development, productions, intralogistics and quality assurance processes. The systems can be adapted to changing requirements at any time. Leaving you perfectly equipped for the future.

Assistance and testing systems

Guided assembly

Management of
material supply

Inspection workflows and
testing processes

Integration of assembly instructions and test systems

The elution two software supports your workflows in modern assembly, increases your production quality and thus optimises your production productivity. elution two manages the material supply and supports employees in performing their tasks through the assistance system elution two assembly. Screens at the avero workstation visualise assembly instructions – individually adapted to the required degree of assistance. Pick-by-light systems reduce picking times and additionally help in selecting the right parts.

With modern technologies you ensure efficient work processes and maximise workflow productivity. Production processes can be coupled with directly subsequent testing processes on our modern assembly lines. Quality assurance steps integrated in-line supplement the assembly process. Faults are thus identified ahead of the end-of-the-line test. These efficient measures for fault testing provide particularly good support when there is a large number of variants.

Assistance and testing systems

High-variant products
produced efficiently

Shorter familiarisation time

Avoidance of errors

Digitally assisted workstations

With the digital assistance system elution two assembly you support both experienced assembly professionals and untrained employees with individual task schedules. They can thus assemble even high-variant and complex products with top production quality. Free your specialist personnel from time-consuming documentation so that they can concentrate on their core competence. The standardised interfaces from elution two assembly make simple integration in your existing IT environment possible. This means that the platform-independent solution not only connects individual workstations, it

also communicates with your higher-order systems. The task schedules in elution two assembly are designed for intuitive operation. On the one hand, this benefits your assembly employees, who receive optimum support thanks to instructions adapted to their skills and language. On the other, it is easy to create new task schedules and edit existing ones: authorised users can effortlessly make changes via drag & drop and thus react quickly to new workflows, products and variants.

Colour spectrum

Environmentally friendly, permanent finely textured powder coating of steel parts

avero workstation storage systems are available in a modern colour combination of light grey and anthracite grey. The neutral design will match any production environment.

Special colors available on request!

ESD versions of workstation storage systems available

avero workstation storage systems are also available as an optional ESD version with conductive surfaces. Your bott representative will be more than happy to discuss ESD protection zones and ESD workstations with you.

Information for your product selection

Table frame with height adjuster via electric motor

- Mechanical, infinitely variable height adjuster with electric motor
- Memory function for 3 work heights
- Frame height (without worktop) 613 to 913 mm or 713 to 1113 mm
- Load capacity:
- Base frame without optional table set-up: 200 kg
- Base frame with optional table set-up: 300 kg

Table frame with height adjuster via hand crank

- Hydraulic, infinitely variable height adjuster with hand crank
- Frame height (without worktop) 613 to 913 mm or 713 to 1113 mm for table depth 750 and 900 mm
613 to 913 mm or 713 to 1013 mm for table depth 600 mm
- Load capacity:
- Base frame without optional table set-up: 200 kg
- Base frame with optional table set-up: 300 kg

Table frame with height adjustment in increments

- Height of table can be adjusted using hole spacing when legs are mounted
- Frame height (without worktop) 613 to 913 mm or 713 to 1113 mm
- adjustable in increments of 25 mm
- Load capacity:
- Base frame without optional table set-up: 200 kg
- Base frame with optional table set-up: 300 kg

avero system widths

- avero system dimensions make the modular combination of components and assemblies possible
- System widths of table set-ups and accessories: 450, 900, 1350, 1800 mm
- Additional system width 675 mm with system and swivel frames as well as with supply and parts trolleys

Single workstations

Complete module 1 DE

- 3x vertical profile
- 3x cable duct with brush strips for vertical profile
- 2x overhead arm for vertical profile
- Suspended drawer cabinet W 375 x D 500 x H 300 mm with 2x 100 mm drawers and lock
- Overhead rail with carriage
- LED ECO 28 W strip light with 5 m connecting cable and Schuko plug
- Retaining rail with 3 gang Shuko socket strip, ON/OFF switch and 3 m connection cable with Schuko plug
- 2x perfo perforated panel, height 480 mm high, for system width 450 mm
- perfo perforated panel, 240 mm high, for system width 450 mm
- Tray, 350 mm deep, for system width 450 mm, kitted with 3 bottBoxes M3
- 2x tray, 200 mm deep, for system width 450 mm, kitted with 3 bottBoxes M2
- Swivel frame, system width 750 mm
- perfo perforated panel for swivel frame
- Tray, 350 mm deep, for swivel frame 450 mm, kitted with 4 bottBoxes M3
- Bin rail for swivel frame, kitted with 5 bottBoxes M3
- Laminate-coated worktop
- Table load 200 kg

Base frames

Base frame with height adjuster via hand crank without worktop ESD

- Sturdy steel-aluminium frame
- Installation option on the back for vertical profiles in 225 mm pitch
- Base frames with infinitely variable height adjuster from 643 to 943 mm are particularly suitable for use with a castor set
- 4 height adjustable feet for evening out floor unevenness, height adjustable foot Ø 30 mm, adjustable range height adjustable foot 10 mm
- Lowest stringer also makes the attachment of a hooked footrest or computer holder possible
- ESD version with conductive powder coating, conductive height adjustable feet, EBP with 3 snap fastener connections 10 mm and central earthing point
- Load capacity: 200 kg with load distributed evenly
- Colour: conductive powder-coated (RAL 7035)

Base frames

Castor set for base frame

- Upgrade set to turn average base frames into a mobile single workstation
- 4 swivel castors diameter 100 mm with brake
- Stringer made of conductive powder-coated sheet steel for installation on the base profiles of the base frames
- Raises working area by 125 mm
- Load capacity 200 kg
- Colour: anthracite grey (RAL 7016)
- Info: Not suitable as heavy duty trolley!
- Can only be moved on even hall floor!

Suitable for base frame with system width [mm]	675	900	1,350	1,800
Dimensions Ø x H [mm]	100 x 125	100 x 125	100 x 125	100 x 125

Accessories for table set-up

Vertical profile

- Sturdy conductive powder-coated steel tube with avero perforation on all 4 sides
- For attaching avero accessories at a 40 mm height increment
- Installation on the back of the avero base frame at a 225 mm width increment
- Colour: anthracite grey (RAL 7016)

Dimensions W x D x H [mm]	50 x 60 x 557	50 x 60 x 1197	50 x 60 x 1836
Version	For attachments under the table top	For half-height set-ups	For set-ups with overhead arms
Order ref.	41012019.71	41012016.71	41012007.71

Cable duct for vertical profile

- Cable holder set for installation on the vertical profile
- Cables or hoses are bundled and fixed in place using cable holders
- Cable duct with vertical brush strips on both sides for concealed cable guiding
- Cable duct is inserted onto the cable holders
- Cable exit at any point thanks to brush strips
- Maximum cable/hose diameter 25 mm for cable exit at the brush strips
- Colour: black

Dimensions W x D x H [mm]	48 x 35 x 557	48 x 35 x 1037	48 x 35 x 1197	48 x 35 x 1357	48 x 35 x 1837	48 x 35 x 2157
Version	For attachments under the table top	For transport systems	For half-height set-ups	For mounting frames	For single workstations	For multi-workstations
Order ref.	43504005.10	43504001.10	43504006.10	43504004.10	43504002.10	43504003.10

Accessories for table set-up

Overhead arm

- Installed at the top of the vertical profile
- With avero perforation on the side surfaces
- Cut-out at the transition to the vertical profile for concealed cable guiding
- For attaching avero accessories at a 40 mm depth increment
- Made of conductive powder-coated sheet steel
- Colour: anthracite grey (RAL 7016)
- The bott logo is attached to the outer overhead arm during final assembly

Dimensions W x D x H [mm]	57 x 645 x 117
Order ref.	41011010.71

Overhead rail with carriage

- For fastening to the avero overhead arms
- Variable depth adjustment for installation at increments of 40 mm
- Incl. 1 carriage with snap hook
- Stopper element for carriage at both ends
- Carriage load capacity 10 kg
- Overhead rail load capacity 30 kg
- Overhead rail made of conductive powder-coated sheet steel
- Colour: light grey (RAL 7035)

For system width [mm]	675	900	1.350	1.800	Carriage with snap hook	Pair of stoppers
Depth [mm]	30	30	30	30	28	30
Height [mm]	100	100	100	100	98	25

LED strip light / LED ECO strip light

- Particularly energy-efficient and long-lasting thanks to the use of LED lamps
- Low glare level thanks to prism cover in front of the lamp
- ON/OFF switch on the front of the housing
- GST-18 power supply socket on the back of the housing
- Light colour: daylight white 5500 Kelvin
- For fastening to the avero overhead arms
- Variable depth adjustment for installation at increments of 40 mm
- Type of protection IP40
- Protection class I
- Colour: anodised aluminium

Accessories for table set-up

Lateral LED strip light

- Particularly energy-efficient and long-lasting thanks to the use of LED lamps
- Low glare level thanks to prism cover in front of the lamp
- ON/OFF switch on the front of the housing
- GST-18 power supply socket on the back of the housing
- Light colour: daylight white 5500 Kelvin
- For fastening to the avero vertical profile
- Variable height adjustment for installation at increments of 40 mm
- Inclination continually adjustable by +/- 30°
- Type of protection IP40
- Protection class I
- Colour: anodised aluminium

Illumination level at a distance of 100 cm [lx]	763
Illumination level (maximum value)	1.061
Dimensions W x D x H [mm]	472 x 140 x 40
Lamp	LED 28 W
Order ref.	50502070.97

Dimming module for 1x LED strip light

- Dimming module for retrofitting avero LED strip lights
- For connection of 1x LED strip light
- Ideal for single workstations
- Die-cast aluminium housing (black) with rotary potentiometer and 3m connection cable
- incl. fixing kits for mounting on avero vertical profiles and perforated panels

Description	Dimming module for 1x LED strip light
Order ref.	50203003

Accessories for table set-up

Dimming module for 6x LED strip light

- Dimming module for retrofitting avero LED strip lights
- For connection of up to 6x LED strip lights
- Ideal for multi-workstations and assembly lines
- Aluminium housing (anodised) with rotary potentiometer
- incl. fixing kits for mounting on avero vertical profiles and perforated panels

Description	Dimming module for 6x LED strip light	Connection cable for dimming module 1m	Connection cable for dimming module 2m	Connection cable for dimming module 3m	Connection cable for dimming module 4m	Connection cable for dimming module 5m

Order ref.	42105044.20	42105045.20

Shelf tray depth 650 mm – width 675 mm

- With hooks for suspending in the avero vertical profile
- Raised lip 25 mm all the way round
- Infinitely variable inclination adjustment by +/- 30°
- Infinitely variable depth adjustment
- Load capacity 60 kg
- Made of conductive powder-coated sheet steel
- Colour: light grey (RAL 7035)

For system width [mm]	675	
Version		Divider, pack of 5
Dimensions W x D x H [mm]	675 x 650 x 62	17 x 611 x 50
Depth adjustment range [mm]	194	
Order ref.	42105046.20	41011225.20

Accessories for system frame and swivel frame

Cable tray for shelf trays width 675 mm

- For installation on the back of the shelf trays 200 mm and 350 mm deep
- Suitable for holding socket strips from the avero range
- Made of conductive powder-coated sheet steel
- Colour: light grey (RAL 7035)

For system width [mm]	675
Dimensions W x D x H [mm]	675 x 66 x 62
Order ref.	42105047.20

Label strip for shelf tray width 675 mm

- Downloadable label document templates are available free of charge at www.bott.de/download
- For installation at the front or back
- With inserted paper strip height 16 mm
- Optimised for installation of pick-to-light modules
- Extruded aluminium profile
- Colour: anodised aluminium

For system width [mm]	675
Dimensions W x D x H [mm]	675 x 13 x 35
Order ref.	41011182.97

Accessories for system frame and swivel frame

Label strip for shelf tray width 675 mm labelling strip

- 10 sheets of pre-perforated DIN A4 paper with 12 labelling strips each
- Height strips: 16 mm

Version	Labelling strips 10 sheets DIN A4 landscape format, 12 strips per sheet, height 16 mm
Weight [kg]	0.10
Order ref.	43020001

Rack set 675 mm with bottBoxes

- Equipped with service trays of the bottBox series
- Height-adjustable in 40 mm pitch
- For suspension in the avero system and swivel frame profile
- Load capacity 20 kg
- Made of conductive powder-coated sheet steel
- Colour: light grey (RAL 7035), bottBoxes anthracite grey (RAL 7016)

For system width [mm]	675
Dimensions W x D x H [mm]	675 x 228 x 458
Quantity bottBoxes	15x M2
Order ref.	41011189.16

Accessories for system frame and swivel frame

Rack set 675 mm with bottBoxes ESD

- Equipped with service trays of the bottBox series
- Height-adjustable in 40 mm pitch
- For suspension in the avero system and swivel frame profile
- Load capacity 20 kg
- Made of conductive powder-coated sheet steel
- Colour: light grey (RAL 7035)
- ESD version with conductive bottBoxes (black)

For system width [mm]	675
Dimensions W x D x H [mm]	675 x 228 x 458
Quantity bottBoxes	15x M2
Order ref.	41011189.20

Rack 675 mm

- For three-row assembly with shelf boxes up to max. 195 mm depth
- Height-adjustable in 40 mm pitch
- For suspension in the avero system and swivel frame profile
- Load capacity 20 kg
- Made of conductive powder-coated sheet steel
- Colour: light grey (RAL 7035)

For system width [mm]	675
Dimensions W x D x H [mm]	675 x 211 x 407
Order ref.	41011188.20

Accessories for table base

Footrest

- Ergonomic footrest area 445 x 350 mm (W x D)
- Infinitely-variable foot pedal angle adjustment between 0 to 20
- 210 mm height adjustable in 15 mm increments
- Adjustment range for footrest area is 50-260 mm from the floor
- Meets requirements according to DIN4556
- With slip-resistant, ribbed rubber mat
- Free-standing version with 4 adjustable feet for evening out floor unevenness
- Suspended version with two supports for hanging on bench stringers
- Colour: Light grey metal part (RAL 7035), Black, ribbed, rubber mat
- ESD version with conductive, ribbed, rubber mat, conductive, adjustable feet (freestanding version) and earthing cable (hangable version)

- Material: glass-fibre reinforced plastic

Version	Closed bottom	Open bottom
Dimensions W x D x H [mm]	100 x 106 x 118	100 x 106 x 118
Order ref.	14011033	14011031

Bottle holder

- For holding bottles of up to 96 mm in diameter and Tetra-Pak containers
- For fastening to the avero vertical profile
- Material: zinc-plated steel

Ø [mm]	96
Height [mm]	162
Order ref.	14021058

Accessories

Scanner holder

- Suitable for all standard hand-held scanners
- For installation on perfo perforated panels
- Made of conductive powder-coated sheet steel
- Colour: light grey (RAL 7035)

Dimensions W x D x H [mm]	94 x 100 x 100
Order ref.	41011025.20

perfo power tool holder

- Power tool holder/cartridge holder/can holder made of flexible silicone with powerful neodymium magnet
- Makes screwless and flexible fixing on magnetic surfaces possible
- Diameter: 70 mm

Dimensions W x D x H [mm]	70 x 75 x 28
Weight [kg]	0.03
Order ref.	14021059.10V

Accessories

Industrial chair

- Seat height adjustment with high-quality gas strut
- Seat adjustable in inclination and depth, rounded front seat edge for reduced compressive load
- Backrest with permanent contact function, adjustable in height and inclination, reduced backrest width in upper area for optimal freedom of movement
- Seat and backrest upholstery elements optimally adapted to the anatomy of the body, with hard-wearing, breathable cover fabric that can be replaced at any time
- Five-star base, optionally available with sliding bases or castors
- Version with greater height-adjustment range, additionally with height-adjustable, foldable climbing aid
- ESD version with conductive cover fabric, volume-conducting, black plastic parts and conductive swivel castors
- Colour: Aluminium star base black, plastic elements basalt grey, fabric anthracite

Version	Castors		Slides / with climbing aid		Sliding bases	
Height adjustment range [mm]	450-620		590-870		450-620	
ESD	No	Yes	No	Yes	No	Yes
Order ref.	88601062.90	88601065.90	88601064.90	88601067.90	88601063.90	88601066.90

FIFO shelf

Mobile FIFO shelf

- For provision of materials at the workplace
- Can be configured individually with shelf trays or roller tracks
- Robust base frame with 4 swivel castors, diameter 100 mm, 2 with brakes
- Load capacity 210 kg
- Made of conductive powder-coated sheet steel
- Colour: anthracite grey (RAL 7016)

For system width [mm]	900	
Dimensions W x D x H [mm]	900 x 1045 x 1795	
ESD	No	Yes
Order ref.	41007056.19	41007056.71

Shelf tray for mobile FIFO shelf

- For installation in the mobile FIFO shelf
- Load capacity 60 kg
- Made of conductive powder-coated sheet steel
- Colour: light grey (RAL 7035)
- Divider for shelf tray
- Suitable for shelf trays with depth 1045 mm
- For the creation of a small parts depot
- Made of conductive powder-coated sheet steel
- Colour: light grey (RAL 7035)
- Pack of 5

Version	Shelf tray for mobile FIFO shelf	Divider for shelf tray, pack of 5
System width [mm]	900	
Dimensions W x D x H [mm]	900 x 1045 x 62	17 x 1006 x 50
Order ref.	42105042.20	41011226.20

FIFO shelf

Base shelf for mobile FIFO shelf

- For installation on the base frame of the mobile FIFO shelf
- Load capacity 100 kg
- Made of conductive powder-coated sheet steel
- Colour: anthracite grey (RAL 7016)

For system width [mm]	900
Dimensions W x D x H [mm]	900 x 1045 x 28
Order ref.	42105040.71

System packing table with roll dispenser and cutter

- 2 height-adjustable legs
- Table height with assembled foot elements adjustable via 20 mm hole increments
- Melamine-coated worktop, light grey
- Bottom roll dispenser
- Cutter with cut width 1260 mm
- Shelf with 5 division hoops with a 250 mm gap for clearly dividing folding boxes and other shipping and packaging material.
- perfo perforated panel with storage tray and bin rails for bottBoxes
- Colour: anthracite powder-coated (RAL 7016) leg and vertical profile, light grey powder-coated (RAL 7035) perfo perforated panel

Dimensions W x D x H [mm]	1350 x 750 x 2190
Dimensions Worktop W x D x H [mm]	1.500 x 750 x 30
Order ref.	41032015.19

System packing table

Cutter

- With blade
- For installation on the worktop
- Suitable for use with paper and cardboard
- Incl. clamping rail for holding the packaging material in place
- Cutting width: max. 1240 mm
- Colour: light grey powder-coated (RAL 7035)

Dimensions W x D x H [mm]	1400 x 115 x 230
Order ref.	07002253.16

Roll dispenser top

- Mounting shaft incl. holder for fixing to the vertical profile
- Roll width max. 1000mm
- Without side flange
- Load capacity 45 kg
- Light grey conductive powder-coated (RAL 7035)

Dimensions W x D x H [mm]	1400 x 35 x 100
Order ref.	07002250.16

System packing table

Bottom roll dispenser

- Mounting shaft incl. holder for installation on the base elements
- Roll width max. 1000 mm
- Roll diameter max. 600 mm
- Without side flange
- Load capacity 45 kg
- Anthracite grey conductive powder-coated (RAL 7016)

Worktop depth (mm)	1400
Dimensions W x D x H [mm]	1.397 x 87 x 72
Order ref.	07002249.19

Fixing element for roll dispenser

- For fixing and centring the packaging material on the mounting shaft
- Inner diameter of the packaging rolls: 50-90 mm
- Material: Plastic
- VE2

Dimensions W x D x H [mm]	65 x 95 x 95
Order ref.	80833428

System packing table

Clamping rail

- For holding the packaging material in place for use with the cutter and a roll dispenser at the top and bottom
- For installation between the avero vertical profiles
- Bar made of galvanised sheet steel
- Colour: light grey conductive powder-coated (RAL 7035)

Dimensions W x D x H [mm]	1350 x 60 x 155
Order ref.	07002251.16

Shelf tray with dividers

- Laminated wooden shelf with 5 dividers for the clear division of flat packed boxes, as well as other shipping and packaging materials
- The spacing between the dividers is 250mm

Dimensions W x D x H [mm]	1350 x 500 x 30
Order ref.	42105041.01

Mobile systems

Parts trolley with perfo perforated panels

- For the provision of tools and auxiliary equipment at work
- Robust base frame with swivel castors, diameter 100 mm, 2 with brakes
- Available in 2 heights
- 2 vertical profiles installed in the centre of the base unit
- Assembly with perfo perforated panels on both sides
- Total load bearing capacity 200 kg
- Colour: frame anthracite grey (RAL 7016), perfo perforated panels light grey (RAL 7035)

The workstation system
